Please join us for a discussion on the prevention and care for babies born too soon – the leading cause of newborn deaths. Newborns now account for 44% of all child deaths under five, and are the growing focus of efforts in advancing progress toward the Millennium Development Goals. Learn more about cost effective solutions, new research, support for families and the Every Newborn action plan, launching in May 2014. Find out what actions you can take to help make progress around the goals of A Promise Renewed and support of *Every Woman Every Child*.
