The Global Strategy for Women’s, Children’s and Adolescents’ Health

In 2010, the launch of the Global Strategy for Women’s and Children’s Health was a pivotal moment to accelerate the improvement of the health and well-being of women and children around the world. Vietnam had made our strong commitment and support to the implementation of the strategy.

While the momentum for progress and change for women and children has grown steadily in our country with great achievement in maternal and child health and HIV indicators and targets at all levels, progress is still required, building on the successes and lessons learned to complete the unfinished Millennium Development Goals’ agenda and further pursue our efforts for women, newborn, children and adolescents through Sustainable Development Goals post 2015.

Therefore, on behalf of Socialist Republic of Viet Nam, the Ministry of Health affirm our political and financial support to the Global Strategy for Women’s, Children’s and Adolescents’ Health (2016-2030) as a global effort to bring all stakeholders together in support of countries’ work to improve women’s, children’s and adolescents’ health and well-being.

We pledge to take the needed sustainable actions to end all preventable deaths of women, children, and adolescents within a generation and ensure their well-being and we hold ourselves accountable for our collective progress towards this goal.

Finally, we would like to express our great thanks for your cooperation and support. Please accept, Excellency, the assurances of our highest consideration.

Sincerely yours,

Dr. Nguyen Thi Kim Tien
Minister of Health
